No. 64

Subject: 1943 Cotton-Production Records

Field Distribution: War Board Members, Extension Editors, SCS Regional Information Chiefs, FDA Regional Marketing Reports Chiefs, BAE Regional Analysts, FSA Regional Information Chiefs, FCA Information Agents.

Suggested Use: To be used as background material.

Farmers are asked to keep records of their 1943 cotton production, and it is highly important that these records be kept accurately.

In past years, ginneries have cooperated with the AAA by furnishing detailed records of cotton production for each farm, but this year these records will not be obtained from ginneries, due to the suspension of marketing quotas.

In the past, the records of production have served as a basis for determining the yields used in marketing quota programs, crop insurance programs and in determining AAA payments.

It is to a farmer's best interest that an accurate record of his 1943 cotton production be kept because this record may be needed in future AAA programs. Each farmer should keep each gin ticket, bale receipt, or sales ticket for baled cotton and for lots of seed cotton sold. The AAA has offered to keep these records for any farmer who wishes to deliver them to the county office.
